

In his spare time, Julius enjoys baseball and the outdoors. He has a motor boat and trailer house and spends weekends and vacations camping with his family. He also tinkers with watchmaking and repairs watches in his shop at home. The Rosins live in Richmond and have two sons ages 20 and 16.

\*\*\*\*\*

TEN YEAR EMPLOYEE:

Julius Rosin is another employee who came to us "just off the boat", this one from Germany. Although he was born in Poland, he became a German at the age of 10; he didn't go to Germany, Germany came to him (the Germans took over his part of Poland). He finished school and was apprenticed to a watchmaker for 3½ years until he was drafted into the army. After they discharged him, he finished the war working for the Telefunken Company in the electronics department. At the end of the war when he was free to do as he pleased, he went to work for the Voglender Camera Company until an uncle in Richmond sponsored him to come to the U. S. As an electronic technician in our Electronics Department, and because of his experience as a watchmaker, Julius is our authority on delicate jobs. He also knows about all of our Resistance Thermometers and Probes.

It all started in 1953, when KEH needed someone to organize a sales department, so he phoned Herman Held, a manufacturer's representative in San Francisco. You guessed it, E. F. Schimbor was assigned to the detail. His first office was an unfinished storeroom that he (all alone) soon had remodeled with paint, nails, wood and work. We bought him a desk and the Sales Department was on its

way. He wrote up brochures on our instruments we then manufactured, typed them up and ran them off on his "ditto" machine. He then found people to act as our sales representatives located near oil refineries and arranged for them to represent us. Orders started coming in! Fifteen years of successful operations have proved that Mr. Schimbor knew what he was doing. He was well prepared for the job with his education in chemical engineering and 25 years of technical sales experience. In September of 1957, it became evident that we needed his services full time, so we lured him away from his other job and hired him a secretary.

As Vice President and Sales Manager of the Company, he now maintains contact with our sales representatives in the United States, Canada and Overseas, answers all his correspondence immediately (just ask Judy), keeps Hallikainen Instruments Ltd. in England advised of new foreign business, has a secretary, an applications engineer working full time processing the work he turns out, two salesmen (one for Northern, and one for Southern California), serves on the board of directors and keeps our parking lot in order.

Mr. Schimbor enjoys golf, baseball and spends much of his time landscaping his home in Novato. He and his wife have two married sons, Dick and Mark.

#### OLD TIMERS DINNER:

Representing a total of 157 years, Hallikainen Instruments' twelve 10 year employees and those employees celebrating their 5th anniversary this year will be the guests of the 4th Old Timers Dinner on the night of July 25.

The dinner will be held this year at the Hunt Room of the Treasure Island Officers Club and promises to be in pleasant contrast to the daily humdrum and rigors these employees endure in dedicated service to the Company.

The guests will depart from the Point San Pablo Yacht Club (Richmond) aboard the yacht Sujana II thereby enjoying a leisurely and

relaxing watery ride prior to the island dinner.

\*\*\* Hallikainen Instruments currently enjoys a total employment of 56 employees; they represent a sum total of 279 years. The average length of employment is 4.9 years.

\*\*\*\*\*

The Sheraton-Palace Hotel in downtown San Francisco was the location of this year's Instrumentation Symposium sponsored by the Instrument Society of America (ISA), Northern California Section. This symposium, which ran on May 20, 21 and 22, allowed instrumentation companies to exhibit and introduce their products to users and possible customers who attended the gathering. The symposium also consisted of oral presentation of technical papers relating to the advancement of the state-of-the-art in instrumentation which were presented by local professional people. These papers ranged from "Electrohydraulic Actuators" to "Secondary Electron Spectroscopy" and ran for three days.

Hallikainen Instruments participated in the exhibit by displaying the gravitrol and an assortment of rotameters. E. F. Schimbor, J. Valley and D. Freeman were on hand to demonstrate and answer questions about our equipment.

COMPANY PICNIC: September 8th is the day, Turtle Rock Ranch is the place, and fun is the order of the day for Hallikainen Instruments Employees' Annual Picnic.

Bernice Teeter, Tom Hale and George Kuehn are this year's picnic chairmen and they have promised an exciting and enjoyable, not to mention stomach filling, time to all the employees and their families.

For food there will be chicken plus all the trimmings. Draught beer and soft drinks will be the liquid refreshments served.

Games, prizes and swimming will be available for participation by the entire family;

young and old.

Turtle Rock Ranch is not hard to reach either, but to make sure you can't miss it individual directions on how to reach the picnic will be distributed later.

Sounds great doesn't it? It sounds even greater when you hear that it's all FREE!! for employees and their families. There will be a charge for guests; for more information about guests contact one of the chairmen.

YOU'ALL COME NOW, YOU HEAH?

\*\*\*\*\*

NEW EMPLOYEE:

H. R. Andruess is Hallikainen Instruments' new cello playing, airplane flying, judo throwing, coin hoarding and stamp collecting accountant. Though these are not necessary qualifications for the position he has taken, they are nonetheless his activities outside the office. Joining him on his outside interests are his wife, Helena, and two children; Stephen and Kris.

Mr. Andruess comes to H. I. after three years at Caterpillar Tractors at San Leandro

and with 25 years of active and reserve time in the U. S. Air Force in which he now holds the rank of Major. He was born and raised in Texas, but graduated from the University of Southern California with a degree in Business Administration.

\*\*\*\*\*

BITS ABOUT 'EM:

Herbert Patterson has joined H. I. again to help with the Systems Division work. Mr. Patterson took part in our last systems project with Shell Development.

\*\*\*\*\*

RESIGNATIONS:

Corky Cose has given his notice to resign. He will be with us until July 10. Corky and his wife plan to move to Arkansas to become ranchers.

\*\*\*\*\*

Herbert Liske has rejoined H. I. in the Engineering Department. He will be here for the summer and on part time basis in the fall.

\*\*\*\*\*

Also helping out this summer are two of the Hallikainen children, Harold and Sue.
